Lat: 64:07:00 Status: U/C Acres: 9,325.0 Option: LIMITED 611049 Lon: 146:48:00 Personnel: 1 Start Date: 5/15/06 Area: FAS Legal: 009S 005E 20 F Out Date: Owner: STA #049 Name: Little Delta River Cause: Lightning Admin: L&W

Narrative: The fire was flown by State Detection and mapped by 284CA. It was 85% active. The wind was 285 degrees at 8-10 miles per hour. Active backing into the wind on the north side of the fire was observed and, burning in tundra, blackspruce, and hardwoods. Pockets of white spruce are being taken out along the east flanks where it is paralleling the Little Delta River. Stringers of Aspen hardwoods have slowed the momentum of the fire along the river. To the south the fire was advancing to the ridge of an un-named drainage. The west flank was active primarily in tundra and blackspruce. No natural barriers were observed to the north of the fire. The winter trail originating at the Little Delta River would provide the only break in the fuels. The width varied from 5 to 15 feet. The trail appeared wet in most areas but would provide access.
